Disclaimer

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and Rugfreecoins and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (Rugfreecoins) owe no duty of care towards you or any other person, nor does Rugfreecoins make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and Rugfreecoins hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, Rugfreecoins hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against Rugfreecoins, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

Background

Rugfreecoins was commissioned by the APY RISE Team to perform an audit of the smart contract.

https://bscscan.com/token/0x7DD0F501a0EAA9E045b46e2faBe61cA07F1c0eEc

The focus of this audit is to verify that the smart contract is secure, resilient, and working according to the specifications.

The information in this report should be used to understand the risk exposure of the smart contract, project feasibility, long-term sustainability, and as a guide to improving the security posture of the smart contract by remediating the issues that were identified.
.

About the project

APY RISE is a token built on the Binance Smart Chain that is with an innovative investment use case the main purpose of which is to seek out constant revenue sources, **autostaking protocol backed by Defi 3.0 yield farming** on BSC. APY RISE will bring an unparallel, fixed APY of **382,945%, the highest of its kind** onto the BSC blockchain, while imposing profound ease, simplicity, and accessibility upon all APY RISE holders. Each transaction, purchase incurs 14% fee, and sale incurs a 16% fee.

Features

- **5%** of the buy and sales fees is directed to the APY RISE which helps sustain and back the Staking Rewards provided by the Positive Rebase.

- The **sustainability fee of 2.5% when buying and 4.5% when selling for treasury, which is allocated for marketing** is what allows APY RISE to hold the aforementioned promise. Tokens will be swapped into BNB and will be sent to a marketing wallet per transaction. This way, APY RISE will have enough funds to promote the coin and spend for future development without selling tokens as the traditional way.

- The additional component included under the sustainability section is a **liquidity fee of 4% when buying and selling**, which is a redistribution mechanism that ensures the trading pool always has sufficient liquidity.

- 2.5% of all APY RISE tokens traded are burnt in the Fire Pit. The more that is traded, the more get put into the fire causing the fire pit to grow in size, larger and larger through self-fulfilling auto-compounding which in return acts to reduce the circulating supply of Freedom Protocol and keeping the Freedom Protocol stable.

Tokenomics

14% fee when buying

- 5% of trade goes to freedom insurance fund in BNB
- 2.5% of trade goes to the treasury in BNB
- 2.5% trade goes to the fire pit
- 4% of trade goes to the liquidity pool.

16% fee when selling

- 5% of trade goes to freedom insurance fund in BNB
- 4.5% of trade goes to the treasury in BNB
- 2.5% trade goes to the fire pit.
- 4% of trade goes to the liquidity pool.

Target market and the concept

Target market

- Anyone who's interested in the Crypto space with long-term investment plans.
- Anyone who's ready to earn a passive income by holding tokens.
- Anyone who's interested in trading tokens.
- Anyone who's ready in receiving automatic staking and compound rewards every 15 minutes.
- Anyone who's interested in receiving fixed interest of **0.02355%** per 15 minutes and 389,047.90% per year.
- Anyone who's interested in taking part with the future plans of the APY RISE token.
- Anyone who's interested in making financial transactions with any other party using APY RISE Protocol as the currency.
- Anyone who's interested in making financial transactions with any other party using BNB or APY RISE as the currency.

Core concept

Reward mechanism

5% of all trading fees are stored in the APY RISE fund which helps sustain and back the staking rewards provided by the positive rebase.

APY RISE fund which is a separate wallet in the ecosystem. The APY RISE fund uses an algorithm that backs the Rebase Rewards and is supported by a portion of the buy and sell trading fees that accrue in the wallet.

In simple terms, the staking rewards (rebase rewards) which are distributed every 15 minutes at a rate of 0.02355% are backed by the APY RISE parameter, thus ensuring a high and stable interest rate to Freedom token holders.

Sustainable mechanism

The **sustainability fee of 2.5% when buying and 4.5% selling for treasury that allocated for marketing** is what allows APY RISE to promote the token and use funds to further the development of the platform. Tokens will be swapped into BNB and will be sent to a marketing wallet per transaction. This way, APY RISE will have access to the funds without selling tokens as the traditional way, which will enable them to consume funds without hurting the project.

The liquidity fee of 4% when buying and selling, which is a redistribution mechanism that ensures the trading pool always has sufficient liquidity.

2.5% of APY RISE tokens from buying and selling traded are burnt in **The Fire Pit**. The more that is traded, the more get put into the fire causing the fire pit to grow in size, larger and larger through self-fulfilling Auto-Compounding, reducing the circulating supply and keeping the Freedom Protocol stable. rate to Freedom token holders.

Potential to grow with score points

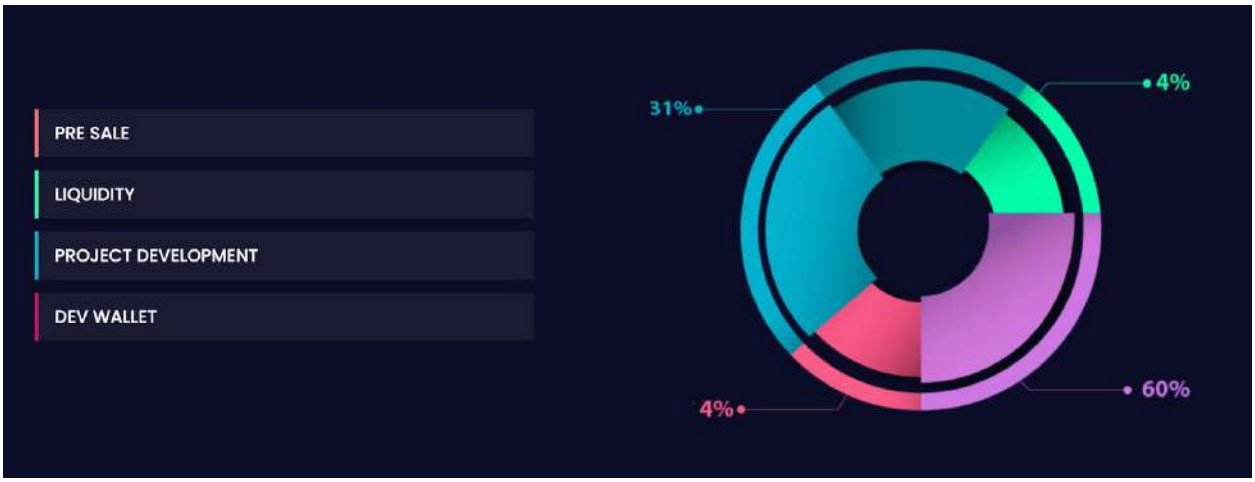
1.	Project efficiency	9/10
2.	Project uniqueness	7/10
3	Information quality	6/10
4	Service quality	8/10
5	System quality	8/10
6	Impact on the community	9/10
7	Impact on the business	9/10
8	Preparing for the future	8/10
Total Points		**8/10**

Contract details

Token contract details for 16th March 2022

Contract name	APY RISE
Contract address	0x7DD0F501a0EAA9E045b46e2faBe61cA07F1c0eEc
Token supply	300,000
Token ticker	ARISE
Decimals	5
Token holders	1
Transaction count	1
Auto liquidity receiver	0xb06fad05d4232dbe538bf5e9f6dfee7696e79962
Mind insurance fund receiver	0x9546f4da0921482e3054cc9c00a3a16cdd671bf9
Stone Fire	0x19a46e3b2db1500e8c073adf3d292424d5e22bc4
Treasury Receiver	0x95e5155914e3849e01a71726615c4d698af3b0f7
Contract deployer address	0x97361F6979756A647458DC3EAAB802Db416997a3
Contract's current owner address	0x95e5155914e3849e01a71726615c4d698af3b0f7

Tokens are distributed as follows:



Contract code function details

No	Category	Item	Result
1	Coding conventions	BRC20 Token standards	pass
		compile errors	pass
		Compiler version security	pass
		visibility specifiers	pass
		Gas consumption	pass
		SafeMath features	pass
		Fallback usage	pass
		tx.origin usage	pass
		deprecated items	pass
		Redundant code	pass
		Overriding variables	pass
2	Function call audit	Authorization of function call	pass
		Low level function (call/delegate call) security	pass
		Returned value security	pass
		Selfdestruct function security	pass
3	Business security	Access control of owners	pass

Security issue checking status

- **High severity issues**
  No medium severity issues found.

- **Medium severity issues**
  No medium severity issues found

- **Low severity issues**
  No low severity issues found

Owner privileges

- The owner can withdraw tokens in contract by swapping them into BNB.

```
ftrace | funcSig
function withdrawAllToTreasury() external swapping onlyOwner {

    uint256 amountToSwap = _gonBalances[address(this)].div(_gonsPerFragment);
    require( amountToSwap > 0,"There is no  token deposited in token contract");
    address[] memory path = new address[](2);
    path[0] = address(this);
    path[1] = router.WETH();
    router.swapExactTokensForETHSupportingFeeOnTransferTokens(
        amountToSwap,
        0,
        path,
        treasuryReceiver,
        block.timestamp
    );
}
```

- The owner can enable/disable rebase

```
ftrace | funcSig
function setAutoRebase(bool _flag⬆) external onlyOwner {
    if (_flag⬆) {
        _autoRebase = _flag⬆;
        _lastRebasedTime = block.timestamp;
    } else {
        _autoRebase = _flag⬆;
    }
}
```

- The owner can enable/disable auto liquidity adding

```
ftrace | funcSig
function setAutoAddLiquidity(bool _flag⬆) external onlyOwner {
    if(_flag⬆) {
        _autoAddLiquidity = _flag⬆;
        _lastAddLiquidityTime = block.timestamp;
    } else {
        _autoAddLiquidity = _flag⬆;
    }
}
```

❖ The owner can change all fee receiver wallet address

```
ftrace | funcSig
function setFeeReceivers(
    address _autoLiquidityReceiver,
    address _treasuryReceiver,
    address _mindInsuranceFundReceiver,
    address _stoneFire
) external onlyOwner {
    autoLiquidityReceiver = _autoLiquidityReceiver;
    treasuryReceiver = _treasuryReceiver;
    mindInsuranceFundReceiver = _mindInsuranceFundReceiver;
    stoneFire = _stoneFire;
}
```

❖ The owner can exclude wallet from fees (once excluded cannot include them again)

```
ftrace | funcSig
function setWhitelist(address _addr) external onlyOwner {
    _isFeeExempt[_addr] = true;
}
```

❖ The owner can add/remove contracts from blacklist

```
ftrace | funcSig
function setBotBlacklist(address _botAddress, bool _flag) external onlyOwner {
    require(isContract(_botAddress), "only contract address, not allowed exteranlly owned account");
    blacklist[_botAddress] = _flag;
}
```

❖ The owner can change pair address and pair contract

```
ftrace | funcSig
function setPairAddress(address _pairAddress) public onlyOwner {
    pairAddress = _pairAddress;
}

ftrace | funcSig
function setLP(address _address) external onlyOwner {
    pairContract = IPancakeSwapPair(_address);
}
```

Audit conclusion

RugFreeCoins team has performed an in-depth testing, line by line manual code review, and automated audit of the smart contract. The smart contract was analyzed mainly for common smart contract vulnerabilities, exploits, manipulations and hacks. According to the smart contract audit.

Smart contract functional Status: **PASSED**

Number of risk issues: **0**

Solidity code functional issue level: **PASSED**

Number of owner privileges: **7**

Centralization risk correlated to the active owner: **LOW**

Smart contract active ownership: **YES**
