# Disclaimer

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

**DISCLAIMER:** By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and Rugfreecoins and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (Rugfreecoins) owe no duty of care towards you or any other person, nor does Rugfreecoins make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and Rugfreecoins hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, Rugfreecoins hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against Rugfreecoins, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

# Background

Rugfreecoins was commissioned by AutoBUSD to perform an audit of the smart contract.

**<https://bscscan.com/address/0xf83849122f769a0a7386df183e633607c890f6c0>**

The focus of this audit is to verify that the smart contract is secure, resilient and working according to the specifications.

The information in this report should be used to understand the risk exposure of the smart contract, project feasibility, long term sustainability and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

# About the project

AUTOBUSD is a new Cryptocurrency based on the Binance Smart Chain Blockchain that will be distributed through channel partners and made available to everyone, anytime, anywhere. This is the core of our business, and Forex Market will be at the center of the strategy. The application will be a web-based ICO Launch, this Blockchain application will be built using the Binance Smart Chain platform with BEP - 20 as standards.

AUTOBUSD is the First Cryptocurrency to revolutionize manuals to be robots in the world of stocks, a synergy between the reach of stock auto robot program developers and the fast and limitless nature of Blockchain technology. This is a digital asset designed to function as a medium of exchange for the stock industry without any restrictions.

## **Vision**

The goal is not to compete with existing e-cash cash, but to participate cooperatively in the e-cash cash ecosystem as a whole. This is a complementary solution; a tool that will increasingly take users to e-cash cash, Cryptocurrency powered solutions and e-cash wallets.

## **Goal**

It is to be one of the cornerstones of financial inclusion efforts in the 21st century and work with actors who will benefit every month without having to do anything just to invest part of the money.

## **Mission**

AUTOBUSD is a transferable peer-to-peer digital e-cash that is completely safe for users to invest in. It will help investors make the right investment choices and eliminate unnecessary intermediary agents and fees.

# Roadmap

## **Quarter 1 2021**

Blockchain servers settled in the USA

## **Quarter 2 2021**

Launched White paper version 1 Regd. Companies in Thailand, Malaysia & Cambodia

## **Quarter 3 2021**

Pre-Sale ends @ \$ 1 ICO Phase 1 begins

## **Quarter 4 2021**

Listing of ABS on International Exchanges @ \$ 10.

## **Quarter 1 2022**

Considering Accounts viv-s-vis ongoing global projects 31

## **Quarter 2 2022**

Upgrading Blockchain & Launch Mobile App.

## **Quarter 3 2022**

Generating Partnerships & Merchant Affiliation

## **Quarter 4 2022**

Mergers, Acquisitions and Global Amalgamations

## **Quarter 1 2023**

Blockchain Phase X, Beta process & ABS Lounge

## **Quarter 2 2023**

Move from Ether to our own DLT network. Test net + Main net.

## **Quarter 3 2023**

Upgrading All Servers and Technological Mechanism globally

## **Quarter 4 2023**

Considering Accounts viv-s-vis ongoing global projects

# Target market and the concept

## Target market

- ❖ Anyone who's interested in the Crypto space with long-term investment plans.
- ❖ Anyone who's ready to earn a passive income by holding tokens.
- ❖ Anyone who's interested in trading tokens.
- ❖ Anyone who's interested in taking part with the future plans of the Auto BUSD token.
- ❖ Anyone who's interested in making financial transactions with any other party using Auto BUSD as the currency.
- ❖ AUTOBUSD will guide and eventually be the technology that gives both experienced and novice users a peek into the future of Real estate investments.

## Core concept

Customers can buy AUTOBUSD using Fiat currencies such as USD and they can also exchange AUTOBUSD using Ethers or Bitcoins. The User will be able to sell/purchase/trade the AUTOBUSD on recognized Exchanges.

You can use AUTOBUSD to purchase real estate properties, online shopping, insurance, utility bill payments, etc. in times to come adhering to the projected roadmap. It utilizes a value transfer protocol to achieve the transferring of payment on peer-to-peer basis and to build up a decentralized application platform, which brings Blockchain technology into the Real Estate and Investments industry. In addition to that, the payment industry backs the payment ecosystem to fulfill the demands of Customers & merchant. There are many payment gateways/merchants are in the industry of Blockchain. However, the service of the AUTOBUSD payment is totally different, unique, secure & better with extra facilities.

## Funds Usage

20% of the funds will be used to build the AUTOBUSD platform and perform upgrades to the system, which includes team recruiting, training, and the development budget.

10% will be kept in reserve to cope with any emergency or unexpected situation that might come up.

## Objectives

Currently the platform enables selling and buying of cryptocurrencies using bank transfers and will soon make selling and buying an easy process all over India.

AUTOBUSD ensures the security of users' funds via cold storage, and has very strict rules when selecting sellers, providing buyers with the confidence they want in real estate. During the first

phase of the rollout, AUTOBUSD is integrated with the existing platform of Binance Smart Chain, which has been proven to be a reliable and stable base.

The team plan to evaluate migration of the codebase to the Binance Smart Chain platform since the Binance Smart Chain platform is maturing faster. They believe that AUTOBUSD can benefit from the many features Binance Smart Chain can offer. The ultimate objective is to create a decentralized exchange for the people owned by the person, which also provides profit to the people; because they believe their profit is their investors profit too.

Investors invested money will not be dependent upon state regulators, which are volatile and affect investments. With no middle agents, we help you save your investments

### **Implementation – ICO**

AUTOBUSD has an advantage in that our ICO will actually be selling the same Cryptocurrency that we will be marketing. Furthermore, being based in India and established in Singapore, they benefit from a legal environment greatly favorable to token sales. There has been a solid interest around cryptocurrencies for years in India, but the number of India-based companies doing ICOs here is surprisingly low. They want to tap into this interest in Cryptocurrency and participate responsibly in the ecosystem in order to build a successful example for other to follow. They plan to lead our fundraising activity according to the following 3 phases.

- ❖ Pre-ICO
- ❖ ICO period
- ❖ Post-ICO

# Potential to grow with score points

1.	Project efficiency	9/10
2.	Project uniqueness	10/10
3	Information quality	10/10
4	Service quality	9/10

	Function is payable

## Inheritance Hierarchy

## Security issue checking status

### ❖ High severity issues

No medium severity issues found.

### ❖ Medium severity issues

No medium severity issues found.

### ❖ Low severity issues

#### Token vesting

Pancake swap router has not been implemented: This token cannot add to the pancake swap, all buying, and selling are handled by the AutoBUSD exchange platform or other exchange platforms. Therefore, the owner has the right to decide the token price and set fees as per their preference.

#### Fake deposit

Since one portion of transactions are handled through the owner's platform, the owner can show fake transactions and manipulate the token price.

# Owner privileges

- ❖ The owner can transfer ownership.

```
ftrace | funcSig
function transferOwnership(address _newOwner↑) public onlyOwner {
    newOwner = _newOwner↑;
}
```

- ❖ A new owner can accept ownership.

```
ftrace | funcSig
function acceptOwnership() public {
    require(msg.sender == newOwner);
    emit OwnershipTransferred(owner, newOwner);
    owner = newOwner;
    newOwner = address(0);
}
```

- ❖ The owner can start sending airdrops.

```
ftrace | funcSig
function startAirdrop(
    uint256 _aSBlock↑,
    uint256 _aEBlock↑,
    uint256 _aAmt↑,
    uint256 _aCap↑
) public onlyOwner {
    aSBlock = _aSBlock↑;
    aEBlock = _aEBlock↑;
    aAmt = _aAmt↑;
    aCap = _aCap↑;
    aTot = 0;
}
```

- ❖ The owner can enable trading.

```
ftrace | funcSig
function startSale(
    uint256 _sBlock↑,
    uint256 _eBlock↑,
    uint256 _sChunk↑,
    uint256 _sPrice↑,
    uint256 _sCap↑
) public onlyOwner {
    sBlock = _sBlock↑;
    eBlock = _eBlock↑;
    sChunk = _sChunk↑;
    sPrice = _sPrice↑;
    sCap = _sCap↑;
    sTot = 0;
}
```

- ❖ The owner can transfer the contract BNB balance to the owner account.

```
ftrace | funcSig
function clearETH() public onlyOwner {
    address payable _owner = msg.sender;
    _owner.transfer(address(this).balance);
}
```

# Audit conclusion

While conducting the audit of the Auto BUSD smart contract, it was observed that there is nothing alarming with the code and it only contains low severity issues and taking the AutoBUSD token's business concept and the model into consideration the audit is passed.
