With no taxes, the token is ideal for day traders and those wanting to stake and farm to earn \$HODL, \$HODLX, HODL Hands NFTs, and enjoy betting. \$HODLX is both an amazing token in its own right, and an incredible compliment to the entire HODL ecosystem, packed with useful utility, including being able to be swapped for discounted NFTs and used within the future play to earn gaming and poker that are being developed.

# Background

Rugfreecoins was commissioned by the HODL Team to perform an audit of the smart contract.

<https://bscscan.com/token/0xAeBdbcc7d6821E3924EE5167b4138a43c19Cf681>

The focus of this audit is to verify that the smart contract is secure, resilient, and working according to the specifications.

The information in this report should be used to understand the risk exposure of the smart contract, project feasibility, and long-term sustainability, and as a guide to improving the smart contract's security posture by remediating the identified issues.
