

# **The Flintstones Finance Token**

RugfreeCoins Verified on December 11th, 2023

### **Overview**

- No mint function found, the owner cannot mint tokens after initial deployment.
- The owner can't set a max transaction limit
- The owner can't pause trading once it's enabled
- X The owner must enable trade for the holders, if trading remains disabled, no one would be able to buy and sell.
- The owner can't change fees over 20%.
- The owner can't blacklist wallets.
- The owner can't set a max wallet limit
- The owner can't claim the contract's balance of its own token.

### **! HIGH SEVERITY ISSUES**

The owner must enable trade for the holders, if trading remains disabled, no one would be able to buy and sell.

```
function enableTrading() external onlyOwner {
    require(!tradingEnabled, "Trading is already enabled");
    tradingEnabled = true;
    startTradingBlock = block.number;
}
```

### **Disclaimer**

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

### **i** DISCLAIMER

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and RugfreeCoins and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (RugfreeCoins) owe no duty of care towards you or any other person, nor does RugfreeCoins make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and RugfreeCoins hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, RugfreeCoins hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against RugfreeCoins, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

## **Background**

RugfreeCoins was commissioned by the The Flintstones Finance Token Token Team to perform an audit of the smart contract.

### https://bscscan.com/address/0x69748b6237C6741253A4711ba7Ec792EABF30Ce2

This audit focuses on verifying that the smart contract is secure, resilient, and working according to the specifications.

The information in this report should be used to understand the risk exposure of the smart contract, project feasibility, and long-term sustainability, and as a guide to improving the smart contract's security posture by remediating the identified issues.

## **Tokenomics**

### ▲ 5% tax when buying & selling

4% of trade goes to the marketing wallet in BNB 1% of trade goes to the holders in USDT

## Target market and the concept

- Anyone who's interested in the Crypto space with long-term investment plans.
- Anyone who's ready to earn a passive income by holding tokens.
- Anyone who's interested in trading tokens.
- Anyone who's interested in taking part in the Flintstones Finance token ecosystem.
- Anyone who's interested in taking part in the future plans of the Flintstones Finance Token.
- Anyone who's interested in making financial transactions with any other party using the Flintstones Finance Token as the currency.

## Potential to grow with score points

| → Project efficiency  | 8 / 10 |
|---|--------|
| * Project uniqueness  | 8 / 10 |
| Information quality   | 8 / 10 |
| Service quality   | 8 / 10 |
| System quality  | 8 / 10 |
| Market on the community                                     | 8 / 10 |
| impact on the business                                      | 9 / 10 |
| Preparing for the future                                    | 8 / 10 |
| General contract security     ☐     Smart contract security | 9 / 10 |
| X Smart contract functionality assessment                   | 9 / 10 |
| Total Score   | 8.3/10 |

### Legend

| Symbol   | Meaning                   |  |
|----------|---------------------------|--|
|          | Function can modify state |  |
| <b>S</b> | Function is payable       |  |

## **Inheritance Hierarchy**

## **Security issue checking status**

### High severity issues

The owner must enable trade for the holders, if trading remains disabled, no one would be able to buy and sell.

```
function enableTrading() external onlyOwner {
    require(!tradingEnabled, "Trading is already enabled");
    tradingEnabled = true;
    startTradingBlock = block.number;
}
```

### Medium severity issues

No medium severity issues found

#### Low severity issues

The contract is using the SafeMath library, but starting from Solidity 0.8.0 onward, SafeMath is built-in.

```
import "@openzeppelin/contracts/utils/math/SafeMath.sol";
pragma solidity 0.8.19;
library SafeMathInt {}
```

The owner can prevent users from receiving rewards by setting a minimum balance requirement equal to the total supply amount.

```
function updateMinimumBalanceForDividends(uint256 newMinimumBalance) external onlyOwner {
    dividendTracker.updateMinimumTokenBalanceForDividends(newMinimumBalance);
}
```

## **Owner privileges**

 Owner can withdraw any BEP20 tokens from the contract (can not withdraw native tokens)

```
function withdrawStuckTokens(address BEP20_token) external onlyOwner {
  bool success = IERC20(BEP20_token).transfer(
     msg.sender,
     IERC20(BEP20_token).balanceOf(address(this))
  );
  require(success, "transferring tokens failed!");
  require(BEP20_token != address(this), "Owner cannot claim native tokens");
}
```

Owner can get BNB from the contract

```
function withdrawStuckETH() external onlyOwner {
    (bool success, ) = address(msg.sender).call{
        value: address(this).balance
    }("");
    require(success, "transferring ETH failed");
}
```

Owner can change buy fees up-to 10%

```
function updateBuyFees( uint256 _marketingFeeOnBuy, uint256 _rewardsFeeOnBuy)
external onlyOwner {

    marketingFeeOnBuy = _marketingFeeOnBuy;
    rewardsFeeOnBuy = _rewardsFeeOnBuy;

    totalBuyFee = marketingFeeOnBuy + rewardsFeeOnBuy;

    require(totalBuyFee <= 10, "Buy fee cannot be more than 10%");
    emit BuyFeesUpdated(totalBuyFee);
}</pre>
```

Owner can change sell fees up to 10%

```
function updateSellFees(uint256 _marketingFeeOnSell, uint256 _rewardsFeeOnSell)
external onlyOwner {
    marketingFeeOnSell = _marketingFeeOnSell;
    rewardsFeeOnSell = _rewardsFeeOnSell;

    totalSellFee = marketingFeeOnSell + rewardsFeeOnSell;

    require(totalSellFee <= 10, "Sell fee cannot be more than 10%");
    emit SellFeesUpdated(totalSellFee);
}</pre>
```

Owner can include/exclude wallets from fees

```
function setWhitelistStatus(
    address _wallet,
    bool _status
) external onlyOwner {
    whitelisted[_wallet] = _status;
    emit Whitelist(_wallet, _status);
}
```

Owner can enable trading, and once enabled can not disable it again

```
function enableTrading() external onlyOwner {
    require(!tradingEnabled, "Trading is already enabled");
    tradingEnabled = true;
    startTradingBlock = block.number;
}
```

Owner can change the swap point

```
function setSwapTokensAtAmount(uint256 newAmount) external onlyOwner{
    require(newAmount > totalSupply() / 100_000, "SwapTokensAtAmount must be
greater than 0.001% of total supply");
    swapTokensAtAmount = newAmount;
}
```

Owner can change marketing wallet

```
function setmarketingWallet(address _newmarketing) external onlyOwner {
    require(
        _newmarketing != address(0),
        "can not set marketing to dead wallet"
    );
    marketingWallet = _newmarketing;
    emit marketingWalletChanged(_newmarketing);
}
```

### **Audit conclusion**

RugFreeCoins team has performed in-depth testing, line-by-line manual code review, and automated audit of the smart contract. The smart contract was analyzed mainly for common smart contract vulnerabilities, exploits, manipulations, and hacks. According to the smart contract audit.
