

# Cyber Doge Token

RugfreeCoins Verified on October 17th, 2023

#### **Overview**

- No mint function found, the owner cannot mint tokens after initial deployment.
- The owner can't set a max transaction limit
- The owner can't pause trading once it's enabled
- X The owner must enable trade for the holders, if trading remains disabled, no one would be able to buy and sell.
- The owner can't change fees over 20 %, However initially total taxes set to 25% from the code.
- The owner can't blacklist wallets.
- The owner can't set a max wallet limit
- The owner can't claim the contract's balance of its own token.

#### **!** HIGH SEVERITY ISSUES

The owner must enable trade for the holders, if trading remains disabled, no one would be able to buy and sell.

```
function enableTrading() external onlyOwner {
    require(!tradingEnabled, "Trading is already enabled");
    tradingEnabled = true;
    startTradingBlock = block.number;
}
```

#### **Disclaimer**

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

#### **i** DISCLAIMER

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and RugfreeCoins and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (RugfreeCoins) owe no duty of care towards you or any other person, nor does RugfreeCoins make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and RugfreeCoins hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, RugfreeCoins hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against RugfreeCoins, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report.

The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

#### **Background**

RugfreeCoins was commissioned by the Cyber Doge Token Team to perform an audit of the smart contract.

#### https://bscscan.com/address/0x4E7B8c0ea629a2BCd9437fE7386aa9D3bd7f2074#code

This audit focuses on verifying that the smart contract is secure, resilient, and working according to the specifications.

The information in this report should be used to understand the risk exposure of the smart contract, project feasibility, and long-term sustainability, and as a guide to improving the smart contract's security posture by remediating the identified issues.

## **Tokenomics**

- ▲ 0% tax when buying , can change this up-to 10%
- $\blacktriangle$  25% Initial tax when buying & selling , can change this up-to 10%

25% of trade goes to the marketing wallet in BNB

### Target market and the concept

- Anyone who's interested in the Crypto space with long-term investment plans.
- Anyone who's ready to earn a passive income by holding tokens.
- Anyone who's interested in trading tokens.
- Anyone who's interested in taking part in the Cyber Doge token ecosystem.
- Anyone who's interested in taking part in the future plans of Cyber DogeToken.
- Anyone who's interested in making financial transactions with any other party using Cyber Doge Token as the currency.

	Function can modify state
<b>S</b>	Function is payable

# **Inheritance Hierarchy**

#### **Security issue checking status**

High severity issues

The owner must enable trade for the holders, if trading remains disabled, no one would be able to buy and sell.

```
function enableTrading() external onlyOwner {
    require(!tradingEnabled, "Trading is already enabled");
    tradingEnabled = true;
    startTradingBlock = block.number;
}
```

Medium severity issues

No medium severity issues found

Low severity issues

No low severity issues found

#### **Owner privileges**

Owner can change marketing wallet address

```
function setmarketingWallet(address _newmarketing) external onlyOwner {
    require(
        _newmarketing != address(0),
        "can not set marketing to dead wallet"
    );
    marketingWallet = _newmarketing;
    emit marketingWalletChanged(_newmarketing);
}
```

Owner can enable trading, once enabled can not disable again

```
function enableTrading() external onlyOwner {
    require(!tradingEnabled, "Trading is already enabled");
    tradingEnabled = true;
    startTradingBlock = block.number;
}
```

Owner can change buy and sell tax upto 20% (each fees maximum upto 10%)

```
function setBuyTaxes(uint256 _marketingTax) external onlyOwner {
   buyTaxes.marketingTax = _marketingTax;
   require(_marketingTax <= 10, "Can not set buy fees higher than 10%");
   emit BuyFeesUpdated(_marketingTax);
}

function setSellTaxes(uint256 _marketingTax) external onlyOwner {
   sellTaxes.marketingTax = _marketingTax;
   require(_marketingTax <= 10, "Can not set buy fees higher than 10%");
   emit SellFeesUpdated(_marketingTax);
}</pre>
```

Owner can change swap point

```
function setSwapTokensAtAmount(uint256 _newAmount) external onlyOwner {
    require(
        _newAmount > 0 && _newAmount <= (_totalSupply * 5) / 1000,
        "Minimum swap amount must be greater than 0 and less than 0.5% of total
supply!"
    );
    swapTokensAtAmount = _newAmount;
    emit SwapThresholdUpdated(swapTokensAtAmount);
}</pre>
```

Owner can enable/disable swapping

```
function toggleSwapping() external onlyOwner {
    swapAndLiquifyEnabled = (swapAndLiquifyEnabled) ? false : true;
}
```

Owner can include/exclude wallets from fees

```
function setWhitelistStatus(
   address _wallet,
   bool _status
) external onlyOwner {
   whitelisted[_wallet] = _status;
   emit Whitelist(_wallet, _status);
}
```

 Owner can withdraw BNB and any berc20 tokens from the contract (can not get native tokens)

```
function withdrawStuckETH() external onlyOwner {
    (bool success, ) = address(msg.sender).call{
        value: address(this).balance
    }("");
    require(success, "transferring ETH failed");
}

function withdrawStuckTokens(address BEP20_token) external onlyOwner {
    bool success = IERC20(BEP20_token).transfer(
        msg.sender,
        IERC20(BEP20_token).balanceOf(address(this))
    );
    require(success, "transferring tokens failed!");
    require(BEP20_token != address(this), "Owner cannot claim native tokens");
    }
}
```

#### **Audit conclusion**

RugFreeCoins team has performed in-depth testing, line-by-line manual code review, and automated audit of the smart contract. The smart contract was analyzed mainly for common smart contract vulnerabilities, exploits, manipulations, and hacks. According to the smart contract audit.
